Comparing With Himself

Project Rebirth is a secret "super-soldier" experiment run by Dr. Abraham Erskine. Injected with a special serum and dosed with Vita Radiation, Steve Rogers was the first and last success of the project who later became Captain America.

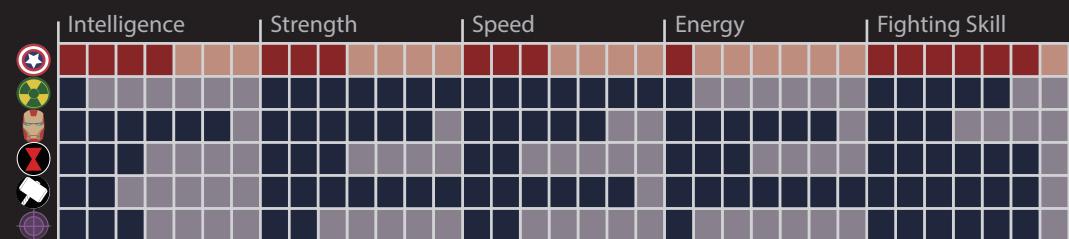

Comparing With Normal People

Through the experiment, Cap is transformed and his strength, endurance, agility, speed, durability, and healing are at the **zenith** of natural human potential. Below is the comparison between Cap's ability and the record of normal people.

Comparing With Other Avengers

He is not the best avenger, but he is the **leader**. It is not because that he is strong, but because his morality and charisma.

Comparing With His Enemy

Both created by the "**Eugenic**" idea, Captain America represents a totally different idea from his enemy, Red Skull. Nazi or anti-Nazi, how do they differ from each other?

What makes him special?

Steven Rogers, that little guy from Brooklyn, makes this character unique.
What matters is the inner beauty, not the technology.

Equipment

Tesseract. An Infinity Stone of unparalleled power owned by Odin.
Destruction

Equipment

Shield, made from an experimental alloy of steel and the fictional vibranium.

Protection

Identity

A weak guy who wanted to serve the country but had been rejected by the army.

Everybody can become a hero.
Defective people should be helped to fulfill their dreams.

What makes him special?

Super-Serum.
What matters is the technology.

Identity

Nazi Commander, Hydra agent.
Only the best can become a hero.
Defective people should be destroyed.

"I'm loyal to nothing, General.
Except the Dream."
— Captain America

Timeline

Born in war era, Captain America dedicated his early life to his Nation.
